Supply List

Note: All supplies are suggestions. Mention of a brand or retailer should not be considered SOA endorsements. Students may make substitutions.

Bring several pictures you have taken or from magazines that you would like to put into a quilt. In class you will work on small fabric sketches for 2 days to zero in on techniques and images. During the remaining days these sketches will be modified and combined into a final project of a size and style that is doable by each individual.

Bring your machine, its manual if you have it, basic sewing supplies, and a variety of fabrics to create your quilts. Your fabrics can be those that are textured and read as solids from a distance or print fabrics that contain elements from nature such as leaves, trees, water, etc.

A variety of fabrics will be available for purchase if you find that what you brought doesn't quite give you what you are going for.
